How much energy can you buy for a dime? It all depends on the kind of food for which you exchange your good money. The above diagram shows "BELLE FLOUR" at a normal price, it is the food that yields the greatest amount of energy for the expenditure of 10 cents, or any other given amount of money, and the supremacy proves how wise the human race has been to give flour such an important place in its diet for more than four thousand years.

Belle Flour contains more energy for amount of money invested than you can get in any other brand of flour

Lighting Rates

For a monthly consumption of 6.66 KWH or less \$1.00
All in excess of 6.66 KWH consumed in one month \$15 per KWH
Electric current for electric irons, electric fans and other electric appliances, if taken from the lighting circuit, will be charged for at the lighting rates, provided, however, that a consumer may avail himself of a cheaper rate by installing, at his own expense, a separate circuit and meter, in which case the following rates will apply:

Current for Electric Irons, Fans, Etc.

For the first 15 KWH consumed in any one month \$12 1-2 per KWH
For the next 15 KWH consumed in any one month \$10 per KWH
All in excess of 30 KWH consumed in any one month \$9 per KWH

Cleaner spark plugs

Your spark plugs will keep cleaner if you use a straight-distilled, refinery gasoline. A mixed or imperfectly refined gasoline breaks up and deposits carbon instead of exploding completely.

HOW ABOUT THIS?

The average wage of the U. S. Steel Corporation rose from \$729 in 1908, to \$925 in 1915. This is an increase of nearly \$200 per man, and it was brought about under a democratic cut in the iron and steel tariff schedule. It is interesting to note in this connection that the wage cost of steel production dropped from \$19.41 per ton in 1908 to \$15.03 per ton in 1915. Here is a shrinkage of \$4.48 in wage cost of steel production coincident with a \$200 rise in the annual wage.

This proves two vital points in our national economy: First that a high wage standard is consistent with efficiency and economy of production; and second, that the old republican doctrine of the high tariff school, that well-paid labor needs protection against cheap labor, is discredited by actual results as disclosed by the reports of the greatest industrial enterprise on the globe.

FOREST NOTES

About 700 million feet of timber was cut on the National forests in 1915.

Experiments with jack pine have shown that it is well suited for making kraft paper. On some of the national forests this tree is used to plant land which is too poor to grow other timber.

A new fire fighting tool has been invented by a forest ranger in California which consists of an interchangeable hoe and rake. It is said to be the best tool of the sort yet devised.

In parts of the West the forest service is cooperating with the Weather Bureau in distributing weather forecasts to the settlers. By the use of Forest Service telephones many isolated sections are reached which could not otherwise receive the reports. Sheepmen, owning bands of lambing ewes, will be particularly benefited, as the warnings enable them to get their sheep under shelter and avoid the losses sometimes caused by late spring storms.
